Notes:

- Items shown represent assemblies tested by Cosentino or testing submitted by third-parties using Cosentino products.

- Facade testing includes a combination of test methods. A minimum of ASTM E330 testing and ASTM C1354 was performed on assemblies represented on our website as mechanically attached facade solutions. Please contact your local representative to learn more.

- Local jurisdictions may have specific requirements not represented in these details. Please contact your local code official to determine the requirements for your specific project. Cosentino has a host of tools and data to address specific project requirements once they are known.

- Fastener (H) to be project specific and determined by project engineer. Considerations include wall type and project specific engineering needs.

- Keil Anchor (7) tested with 7 mm Anchors and bolt to fit anchor and thickness of aluminum.
